

# FORUM GEOMETRICORUM

A Journal on Classical Euclidean Geometry and Related Areas

published by

Department of Mathematical Sciences  
Florida Atlantic University

Volume 18  
2018

<http://forumgeom.fau.edu>

ISSN 1534-1188

## **Editorial Board**

### **Advisors:**

John H. Conway	Princeton, New Jersey, USA
Julio Gonzalez Cabillon	Montevideo, Uruguay
Richard Guy	Calgary, Alberta, Canada
Clark Kimberling	Evansville, Indiana, USA
Kee Yuen Lam	Vancouver, British Columbia, Canada
Tsit Yuen Lam	Berkeley, California, USA
Fred Richman	Boca Raton, Florida, USA

### **Editor-in-chief:**

Paul Yiu	Boca Raton, Florida, USA
----------	--------------------------

### **Editors:**

Eisso J. Atzema	Orono, Maine, USA
Nikolaos Dergiades	Thessaloniki, Greece
Roland Eddy	St. John's, Newfoundland, Canada
Jean-Pierre Ehrmann	Paris, France
Chris Fisher	Regina, Saskatchewan, Canada
Rudolf Fritsch	Munich, Germany
Bernard Gibert	St Etienne, France
Antreas P. Hatzipolakis	Athens, Greece
Michael Lambrou	Crete, Greece
Floor van Lamoen	Goes, Netherlands
Fred Pui Fai Leung	Singapore, Singapore
Daniel B. Shapiro	Columbus, Ohio, USA
Man Keung Siu	Hong Kong, China
Peter Woo	La Mirada, California, USA
Li Zhou	Winter Haven, Florida, USA

### **Technical Editors:**

Yuandan Lin	Boca Raton, Florida, USA
Aaron Meyerowitz	Boca Raton, Florida, USA
Xiao-Dong Zhang	Boca Raton, Florida, USA

### **Consultants:**

Frederick Hoffman	Boca Raton, Florida, USA
Stephen Locke	Boca Raton, Florida, USA
Heinrich Niederhausen	Boca Raton, Florida, USA

## Table of Contents

- Stefan Liebscher and Dierck-E. Liebscher, *The relativity of conics and circles*, 1
- Carl Eberhart, *Revisiting the quadrisection problem of Jacob Bernoulli*, 7
- C. E. Garza-Hume, Maricarmen C. Jorge, and Arturo Olvera, *Areas and shapes of planar irregular polygons*, 17
- Samuel G. Moreno and Esther M. García–Caballero, *Irrationality of  $\sqrt{2}$ : Yet another visual proof*, 37
- Manfred Pietsch, *Two hinged regular  $n$ -sided polygons*, 39–42
- Hiroshi Okumura, *A remark on the arbelos and the regular star polygon*, 43
- Lubomir P. Markov, *Revisiting the infinite surface area of Gabriel’s horn*, 45
- Giovanni Lucca, *Integer sequences and circle chains inside a circular segment*, 47
- Michel Bataille, *On the extrema of some distance ratios*, 57
- Apostolos Hadjidimos, *Twins of Hofstadter elements*, 63
- Li Zhou, *Primitive Heronian triangles with integer inradius and exradii*, 71
- Francisco Javier García Capitán, *A family of triangles for which two specific triangle centers have the same coordinates*, 79
- Robert Bosch, *A new proof of Erdős–Mordell inequality*, 83
- Paris Pamfilos, *Parabola conjugate to rectangular hyperbola*, 87
- Gerasimos T. Soldatos, *A toroidal approach to the doubling of the cube*, 93
- Hiroshi Okumura and Saburo Saitoh, *Remarks for the twin circles of Archimedes in a skewed arbelos*, 99
- (Retracted) Sándor Nagydobai Kiss, *On the cyclic quadrilaterals with the same Varignon parallelogram*, 103
- Gábor Gévay, *An extension of Miquel’s six-circles theorem*, 115
- Nicholas D. Brubaker, Jasmine Camero, Oscar Rocha Rocha, Roberto Soto, and Bogdan D. Suceavă, *A curvature invariant inspired by Leonhard Euler’s inequality  $R \geq 2r$* , 119
- Michel Bataille, *Constructing a triangle from two vertices and the symmedian point*, 129
- Eugen J. Ionaşcu, *The “circle” of Apollonius in Hyperbolic Geometry*, 135
- Mark Shattuck, *A geometric inequality for cyclic quadrilaterals*, 141
- Hiroshi Okumura and Saburo Saitoh, *Harmonic mean and division by zero*, 155
- Paris Pamfilos, *Rectangles circumscribing a quadrangle*, 161
- Mihály Bencze and Marius Drăgan, *The Blundon theorem in an acute triangle and some consequences*, 185
- Purevsuren Damba and Uuganbaatar Ninjbat, *Side disks of a spherical great polygon*, 195
- Nikolaos Dergiades, *Parallelograms inscribed in convex quadrangles*, 203

- Mohammad K. Azarian, “A Study of *Risāla al-Watar wa’l Jaib*” (*The Treatise on the Chord and Sine*): Revisited, 219
- Blas Herrera, *Algebraic equations of all involucre conics in the configuration of the  $c$ -inscribed equilateral triangles of a triangle*, 223
- Tran Quang Hung, *A construction of the golden ratio in an arbitrary triangle*, 239
- Martina Štěpánová, *New Constructions of Triangle from  $\alpha, b - c, t_A$* , 245
- Robert Bosch, *A new proof of Pitot theorem by AM-GM inequality*, 251
- John Donnelly, *A model of continuous plane geometry that is nowhere geodesic*, 255
- John Donnelly, *A model of nowhere geodesic plane geometry in which the triangle inequality fails everywhere*, 275
- Omid Ali Shahni Karamzadeh, *Is the mystery of Morley’s trisector theorem resolved ?* 297
- Floor van Lamoen, *A synthetic proof of the equality of iterated Kiepert triangles*  
 $\mathcal{K}(\phi, \psi) = \mathcal{K}(\psi, \phi)$ , 307
- Şahlar Meherrem, Gizem Günel Açıksoz, Serenay Şen, Zeynep Sezer, and Güneş Başkes, *Geometric inequalities in pedal quadrilaterals*, 309
- Paris Pamfilos, *Self-pivoting convex quadrangles*, 321
- Floor van Lamoen, *Orthopoles and variable flanks*, 349
- Nikolaos Dergiades and Tran Quang Hung, *Simple proofs of Feuerbach’s Theorem and Emelyanov’s Theorem*, 353
- Roger C. Alperin, *Pedals of the Poncelet pencil and Fontené points*, 361
- Francisco Javier García Capitán, *Circumconics with asymptotes making a given angle*, 367
- Yong Zhang, Junyao Peng, and Jiamin Wang, *Integral triangles and trapezoids pairs with a common area and a common perimeter*, 371
- Giuseppina Anatriello, Francesco Laudano, and Giovanni Vincenzi, *Pairs of congruent-like quadrilaterals that are not congruent*, 381
- Gábor Gévay, *A remarkable theorem on eight circles*, 401
- Hiroshi Okumura, *An analogue to Pappus chain theorem with division by zero*, 409
- Rogério César dos Santos, *Polygons on the sides of an octagon*, 413
- Stefan Liebscher and Dierck E.-Liebscher, *The love for the three conics*, 419
- Gerasimos T. Soldatos, *A polynomial approach to the “Bloom” of Thymaridas and the Apollonius’ circle*, 431
- Author index*, 435
